

Environmental Services Animal Control Successful Adoption Stories

'Tail' of Two Dogs and a Man

A ***Transforming Wichita Together*** (TWT) classroom exercise introduced me to the great folks at Environmental Services Animal Control. They, in turn, introduced me to *Toby*, an abandoned poodle, recovered in a cage too small for him to stand and *Reva* the Sheppard/Chow mix, who grew up in a Dillons' parking lot during the winter ice storms with little direct human contact. ***Thank you, TWT and Environmental Services Animal Control - for my two best friends!***

Ken Berman, Systems Analyst II - IT/IS

Papa, Mama, and Mia!

Drew, I wanted to share a great success story with you and your staff and volunteers. You may or may not remember "Mia". She was a very sweet German Shorthair Pointer, whom I adopted on Mother's Day this year for the ***National GSP Rescue***. Mia was found as a stray in Haysville and was in your shelter for almost 2 weeks. I just wanted to let you know that she found a permanent home in Houston, Texas with my parents. She is doing great and is very happy and healthy.

She goes on walks every day to my parents neighborhood swimming pool, has a great back yard and gets lots of attention (my parents are retired). I just thought some people might like to know that she is doing great and is being well taken care of, just like she deserves. Thanks, for

giving her a little extra time and a chance to have a great life. She sleeps right next to my parent's bed every night in her kennel. Sincerely, Steve Crocombe

Are there more stories to be told? Do you, personally, have a story you'd like to share? We need your successful adoption story, telling of how your furry little pal(s) came into your life. Environmental Services Animal Control would like to feature your 'Love Tail' on our website. Please submit pictures, in jpeg format and your adoption story to pkingsburns@wichita.gov.
